

## **PRODUCT SPECIFICATION**

### **WIZARD™ MULTIMEDIA LECTERN**

#### **General:**

The mobile, multimedia lectern shall be a Wizard™ MML as manufactured by **Custom Display Solutions, Inc.** The Wizard™ MML shall be comprised of a rolling A/V equipment cabinet with a laminate work surface, recessed monitor well, extending keyboard and document camera shelving and "secure gear" cabinet doors with clear acrylic equipment covers. The Wizard™ MML shall have powder coated sheet metal cladding, integrated rack rail with locking equipment access doors and 4" diameter, locking casters.

The Wizard™ MML shall be available in various configurations and colors, with the keyboard and document camera shelving locations (left or right) being interchangeable. Single width, "podium" versions are also available (called Wizard™ MMP) with either keyboard or document camera shelving as an option. The Wizard™ Series of multimedia furniture is available in black, brown and taupe colors, with optional custom colors available upon request.

The Wizard™ MML laminate work surface may also be designed to accommodate touch panel and patch panel inlays.

#### **Design & Documentation:**

The Wizard™ MML shall be designed completely in CAD and sign-off drawings will be provided to the customer prior to fabrication. A serial number shall be applied to the specified design and the CAD files shall be archived for future reference. The Wizard™ shall ship completely assembled.

#### **Construction:**

The Wizard™ MML shall be a prefabricated, heavy-duty, extruded aluminum design. Wizard™ MML construction includes sheet metal panels supported by an aluminum framework. The aluminum framework shall consist of precision extruded aluminum profile, held fast by "fixbloc & t-bolt" joinery. There shall be no welded components in the Wizard™ MML design.

#### **Ventilation:**

The Wizard™ MML lower side panels have perforations to allow for proper ventilation. For densely populated designs with high BTU equipment, the MML may be outfit with optional exhaust fans, to provide for the efficient evacuation of electronic equipment heat. The bottom of the unit shall be mostly open to allow for maximum air circulation and to enable cabling to be run directly into the floor. As required, additional intake ports and fans will be strategically added to optimize ventilation.

#### **Projector & Cable Access:**

The Wizard™ MML shall be outfit with cable races, enabling neat and efficient cable management.

#### **Factory Testing:**

Prior to shipment, the Wizard™ shall be pre-assembled. Satisfactory performance shall be documented and approved by the Wizard™ manufacturer. A written and photographic record of this factory test shall be kept by the manufacturer and made available to the customer upon request.

#### **Warranty:**

The Wizard™ Factory Warranty shall cover all parts and labor for one full year from invoice date against defects in manufacturing. The manufacturer reserves the right to repair or replace the defective item to satisfy the customer.
